

Working With Groups of Pictures and More Online Editors

1. Sometimes you might want to take a number of pictures and put them together into a single picture.
2. Go to www.photovisi.com
3. photovisi provides a number of templates that can be used to create computer wallpaper sized collages of photos. Click on *Click here to start!*
4. Then look at the templates given and click on the one you'd like to use.
5. Next, click on *Click here to upload photos!* Notice the note about holding down control (Ctrl) to select multiple photos at once. Choose up to the maximum number of photos listed under the template.
6. It will take some time to upload and arrange the files. Once it's completed you'll see a preview of your collage. If you'd like to replace any pictures, you can do so.
7. When you're satisfied with the layout and pictures, click *Preview OK? Click here to continue!*
8. Finally, you can click on one of the given links to download the image. I recommend choosing the largest one available, 1280x800.
9. Save your finished product and show me what you've created through all the tutorials.
10. We have only scratched the surface of the online photo tools that are currently available. Below are some more websites you can check out to do fun things with your photos:
 - a. <http://bighugelabs.com>
 - i. Tons of different things to do with photos! Check out "Magazine Cover", "Movie Poster", "Framer" and more.
 - b. <http://www.splashup.com>
 - i. Working with this site is very much like working with a program on your computer and layout should seem very familiar. This is one of the best sites for working with multiple images at the same time.
 - c. <http://lunapic.com>
 - i. Check out the Effects and Animation menus here for many cool effects! Be sure to check out "Photo Spread" and "Warhol".
11. Use any remaining time to work with the skills you've learned in this class.
12. Next, take any type of pictures you'd like to work with. Think about what you want to do for a final picture. Remember the different tools we learned about, including: the clone tool, cropping, resizing, the smart scissors, etc. Most importantly, have fun!!
