

Sign-up for a Yahoo! Geocities Account in order to get free space for your website.

1. Go to [www.geocities.com](http://www.geocities.com)
2. At the top you will see Geocities Free, click on *Sign Up Now*.
3. On the next page click on *Sign Up* under **Don't have a Yahoo! ID?**
4. Fill in the information on the next page.
5. Pick a Yahoo! ID that will be easy for you to remember. Remember that this will be the last part of what people type in to go to your website. So make sure that it is reasonable and appropriate! You cannot have spaces in your username and use only lowercase letters.
6. Pick a password that you can remember! Do not share your password with anyone! Make sure it is something you can remember so that you don't forget it, because if you do, you might have to start everything all over! If you aren't good at remembering things, write the password down somewhere you'll remember it.
7. Fill in the rest of the required information. Use as much real information as you are comfortable with. When you put in your birthday, you can use your real birthday, but make sure that the year you put in is before 1992. If you don't, it makes you do some additional things that we don't want to bother with.
8. When you've completed the form, double-check everything, then click *I Agree* at the bottom.
9. If you filled in everything correctly, you should get a message that says "Registration Completed: Welcome!"
10. Print out this page so you have a copy of your information and keep it with your packet.
11. Make sure you uncheck **Yes, download Yahoo! Toolbar – get spyware protection**
12. Then click *Continue to Yahoo! Geocities*
13. Answer the questions about your website and click *Submit*.
14. The information shown on the next page is VERY important! It lists your homepage URL. It will be in this form:  
<http://www.geocities.com/YOURUSERNAME> ←This will be whatever you picked for your username. Write down your URL here:
  
15. Did you remember to write down your URL above? If not, be sure you do it now!! DO NOT skip this step!!
16. Click on *Build your web site now!*
17. This brings you to the main administration page for Geocities. We'll be seeing this page a lot, so take a look around to get familiar with the layout.
18. Now we have to get something to put up on your website!
